

MACHINE DESCRIPTION

production up to 2400 rows/hour.

The trays advance one next the other on the trayfiller belt, ensuring the maximum filling uniformity in every cell, also in Different kinds of nozzles are available as accessories to those along the edge of the tray.

The filling can be adjusted with one single handle and Control panel for data display, programming, production enables a variable filling with soft, medium or high density.

The brushing group perfectly cleans the trays from the exceeding soil.

The row seeding line KAPPA65C compact can reach a The automatic row seeding group, with electronic control, The drum coverer for vermiculite or other grains performs a perfect singularisation of both small and big seeds.

satisfy any requirement (silicone, multiseeding, etc.).

and diagnostic can store up to 99 seeding programs.

The pneumatic vibrator in the seed holding plate improves the machine working, which can perform well also with a small quantity of seeds.

allows to deposit one or more seeds in the same cell with a great uniformity and enables to choose the working width and the quantity of product distributed, to reduce any wasting.

> Each component of the machine is designed and produced to improve the work of operators, in order to reduce the maintenance and speed up the seed's change.

DETAILSSEEDING

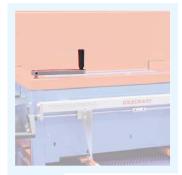

Ergonomic panel for an easy control of all machine's functions.

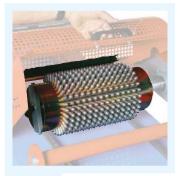

Colour touch-screen with intuitive graphic easy to use for the operator.

Tray denester with 2 movements, adjustable with one single handle.

The adjustment of the tray's height, width and soil density is made with **functional handles**.

Driven dibbler with cleaning brush.

INCLUDED ON:

ALL SEEDING LINES

Double blow bar with more holes for the **seeding singulation**.

INCLUDED ON:

ALL SEEDING LINES

Easy and fast adjustment of seeding system's height and dibbler's depth, thanks to comfortable handles.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C, YPSILON65/65C, KAPPA65C

INCLUDED ON:

INCLUDED ON:

LAMBDA65/65C

ALL SEEDING LINES

Electric adjustment of the drums' height with touch-screen.

INCLUDED ON:

ALL SEEDING LINES

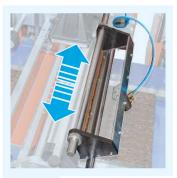

Adjustable speed hammers. The vibration helps placing the seeds in the center of the holes.
